

FAASTeam presents:

Destination: Colorado Rockies

This installment in our Destination series highlights flying in the Colorado Rockies. Extensive training and planning is necessary to achieve the rewards of sweeping aerial views and successfully tackling those challenging high altitude airports. We will discuss pre-trip training, emergency preparedness, route planning, weather considerations, safe flying through mountain passes, as well as what to do once you reach your destination. This seminar is presented by a team of pilots and CFIs who will soon embark on a five-day trip through the Colorado Rockies. More information will be available about the trip, including how to participate. San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our weekly seminars, please visit <http://sancarlosflight.com/activities-and-events>.

Directions: Located in the Skyway Building, next to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
